In the original publication [1], there was a mistake in Figure 6 as published. In Figure 6a, one of the panels was accidentally duplicated. For this reason, we want to upload a new version where we amend this error. The corrected Figure 6 appears below. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

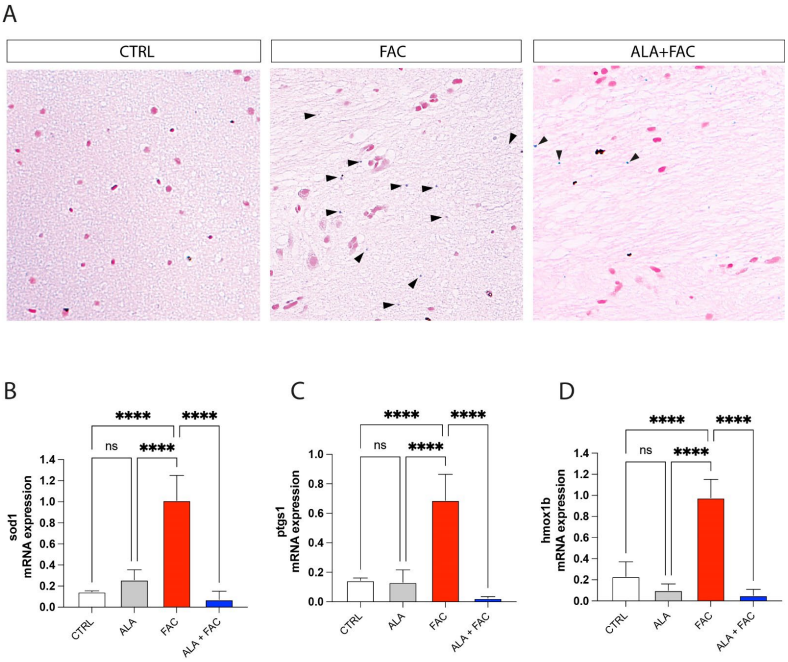

Figure 6. *Cont.*

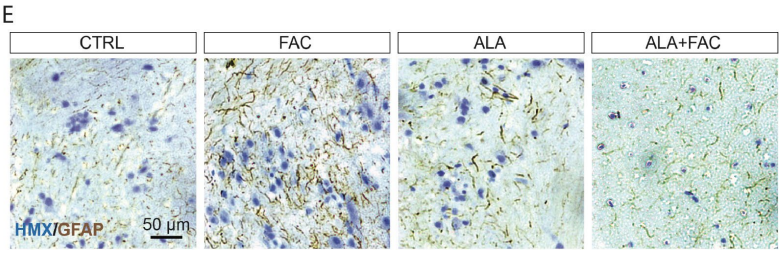

Figure 6. Iron exposition induces iron accumulation and gliosis in zebrafish brain. (**A**) Representative pictures of the brain stained with Perl's Prussian Blue staining in control, FAC- and ALA + FAC-exposed zebrafish brain. (**B**–**D**) Quantification of mRNA expression levels of sod1 (**A**), ptgs1 (**B**) and hmox1b (**C**) in control, ALA-, FAC- and ALA + FAC-exposed zebrafish. (**E**) Representative pictures of the brain stained with hematoxylin and GFAP of control, FAC-, ALA- and ALA + FAC-exposed zebrafish. **** p-value < 0.0001.
