The original article to which this Erratum refers was published in *Movement Disorders*, Volume 19, Issue 12, pages 1451–1453.

In the brief report by Capecchi and colleagues that appears in this issue of *Movement Disorders*, the authors

mistakenly refer to the patient's 30-year-old daughter, who suffers from parkinsonism. This individual is in fact the sister of the described patient. © 2004 Movement Disorder Society
